Foot-operated Hand Washing Sets

Peace of mind hand hygiene – protect against the virus

Benefits of 'hands free' taps

FLEXIBLE – can be connected to any type of spout. Add a TMV valve for controlled temperature of mixed water.

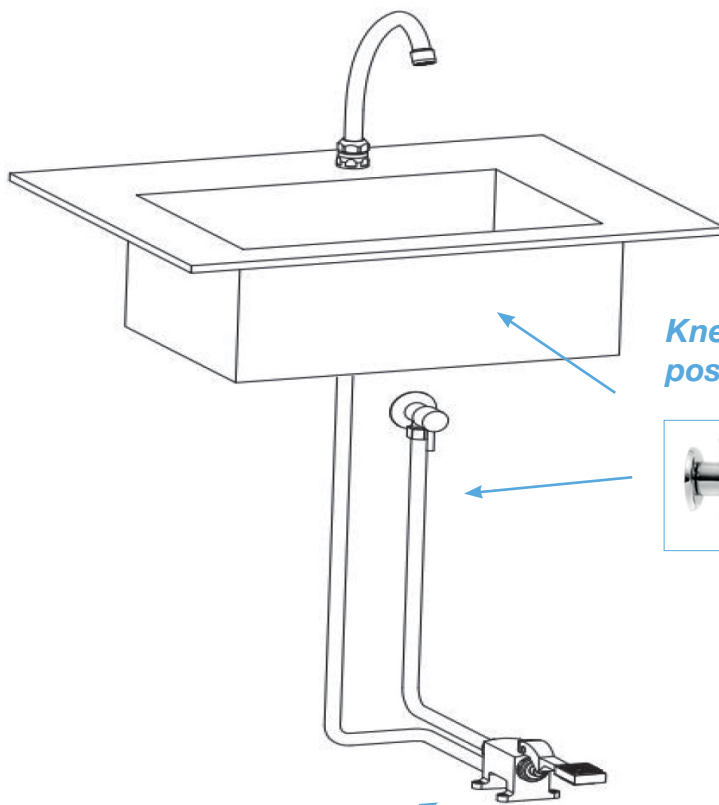

EASE OF USE – Helps multitasking as hands are free to wash food or pots and pans.

HYGIENIC – wash your hands without spreading bacteria to the tap handle. Paramount in medical settings and to prevent the spread of COVID-19 and other diseases.

EFFICIENT USE OF WATER – a foot pedal allows you to turn water on and off easily which avoids waste.

Knee operated lever can be positioned anywhere

Available as push button or pedal operated control

Areas of Use

- ✓ Healthcare
- ✓ Care Homes
- ✓ Assisted Living
- ✓ Commercial
- ✓ Schools & Nurseries
