

How to identify your tap or shower cartridge and replace it

Please help us to help you identify your cartridge. Please remove the cartridge/valve and email the following information to us at salesinfo@notjusttaps.co.uk

Quarter turn valve

TIP

To count the number of teeth on a cartridge make a mark on one of the teeth with a pen and count round, or take a photo and enlarge it to help count

Please email us a photo as shown and the following information:

1. Number of teeth on spline
2. Total length in mm
3. Diameter of middle thread
4. Diameter of the base

Compression (washer) valve

TIP

Please ensure valve is fully wound-up to measure the minimum length

Please email us a photo as shown and the following information:

1. Number of teeth on spline
2. **Minimum** length in mm
3. Diameter of middle thread
4. Diameter of black washer

Plastic cartridge

Please email us a photo as shown and the following information:

1. Main body diameter
2. Total length in mm
